Profile Summary

SENIOR BI ANALYST | POWER BI DEVELOPER

Experienced Business Intelligence Analyst with 3+ years of experience delivering end-to-end BI solutions including data modelling, KPI development, dashboard design, and enterprise deployment. Strong expertise in Power BI, SQL, and Python with hands-on experience in Power BI Service, RLS, Gateway configuration, and embedded analytics for web and mobile applications. Proven ability to translate business problems into data-driven insights for strategic decision-making.

Academic qualifications

| Course                 | College/School/University                                               | Year of Passing | Marks Obtained |
|------------------------|-------------------------------------------------------------------------|-----------------|----------------|
| M.C.A.                 | Guru Jambheshwar University of Science & Technology, Hisar              | 2026 (Expected) | Pursuing       |
| B.C.A.                 | Manav Rachna International Institute of Research and Studies, Faridabad | 2023            | 8.05 CGPA      |
| 12 <sup>th</sup> Class | Police DAV Public School, Ambala(Commerce)                              | 2020            | 92.6%          |

Awards and Accomplishments

- **Certified Microsoft Data Analyst Associate (DA-100)** — Successfully completed under Honeywell Student Empowerment Program 2023
- **Python Programming Training (Grade A)** — Dreamer Infotech Pvt. Ltd, 2022
- **Website Designing Internship** — Social Internship Program, Dr. O.P. Bhalla Foundation & Manav Rachna University 2023

Work Experience

Business Intelligence Analyst at Orion Credence Solutions Pvt. Ltd. | June 2023 – Present

- Independently delivered end-to-end Business Intelligence solutions from requirement gathering and KPI definition to dashboard development, deployment, and ongoing support.
- Developed an **AI-enabled chatbot** for vessel performance analytics, enabling natural language queries on CII, environmental, and event-based data for faster decision-making
- Designed and developed enterprise-grade Power BI dashboards and reports supporting web and mobile applications, enabling real-time operational and strategic decision-making.
- Implemented Power BI Embedded (App Owns Data) solutions to seamlessly integrate analytics into client-facing platforms.
- Performed data analysis, modelling, and transformation using SQL, Excel, and Python to ensure data accuracy, performance, and scalability.
- Collaborated with business stakeholders to translate complex operational requirements into actionable analytics and standardized KPI frameworks.
- Ensured data quality, performance optimization, and governance across multiple analytical modules.

Projects

1.Voyage Performance Analytics Solution

Business Objective:

To provide centralized visibility into vessel performance, fuel efficiency, and operational KPIs for better voyage - level decision-making.

Key Contributions & Responsibilities:

- Delivered end-to-end solution independently from requirement gathering to deployment

- Designed multi-layered dashboards (Snapshot, Audit, Monitoring views)
- Developed advanced DAX measures for fuel consumption, time variance, and efficiency tracking
- Built Laden vs Ballast performance comparison models
- Performed data modelling and optimization for handling large maritime datasets
- Created interactive reports with drill-down and drill-through capabilities
- Integrated multiple data sources for voyage-level consolidation and analysis
- Implemented Row-Level Security (RLS) for role-based access
- Configured On-Premises Data Gateway and automated scheduled data refresh to ensure secure, real-time reporting

**Impact:**

- Enabled real-time monitoring of vessel performance
- Improved fuel efficiency tracking and operational optimization
- Supported decision-making aligned with Charter Party performance benchmarks

**Tech Stack:** Power BI, DAX, SQL

## 2. CII Insights & Voyage Simulator (Predictive Analytics)

**Business Objective:**

To forecast emissions, CII ratings, and fuel consumption for proactive compliance and voyage planning.

**Key Contributions & Responsibilities:**

- Designed predictive dashboards and simulation models using historical voyage data
- Developed what-if analysis reports for scenario-based planning
- Built dynamic KPIs for AER, CII ratings, CO<sub>2</sub> emissions, and fuel savings
- Used parameter-driven modelling for voyage simulations
- Implemented trend and variance analysis dashboards
- Ensured performance optimization using efficient data models and DAX
- Applied RLS for secure stakeholder-specific access
- Enabled automated refresh using Gateway connection

**Impact:**

- Enabled proactive regulatory compliance (Fuel EU, ETS)
- Improved fuel optimization and emissions planning
- Enhanced strategic decision-making through forecasting capabilities

**Tech Stack:** Power BI, Python, SQL

## 3. Executive Vessel Performance Dashboard (One-Page Snapshot)

**Business Objective:**

To provide leadership with a consolidated, high-level view of vessel performance across operational and environmental KPIs.

**Key Contributions & Responsibilities:**

- Designed single-page executive dashboard (YTD & Monthly views)
- Integrated KPIs: CII, AER, EEOI, CO<sub>2</sub> emissions, fuel consumption, speed metrics
- Developed interactive visuals for trend, variance, and performance analysis
- Optimized dashboard for fast performance and usability
- Enhanced UI using custom visuals and structured layout
- Implemented RLS and access control mechanisms
- Configured scheduled refresh for automated reporting

**Impact:**

- Enabled quick executive decision-making KPI cards, trend and variance analysis, and Fuel EU/ETS compliance visibility.
- Reduced reporting dependency through centralized insights
- Improved visibility into operational and compliance metrics

**Tech Stack:** Power BI, DAX, SQL, Python

## Technical Skill

- **Visualization Tool - Power BI (Dashboard & Report Development, DAX, Data Modelling, RLS):** Proficient Level  
**Power BI Embedded – App Owns Data** (Embedding reports and dashboards into web & mobile applications)
- **Python** (*Pandas, Numpy, Matplotlib, Seaborn, Sklearn*): Proficient Level
- **SQL:** Intermediate Level
- **Microsoft Excel:** Intermediate Level
- **Web Scrapping (Selenium, Beautiful soup):** Intermediate Level
- **Machine Learning, LLMs Models & Azure:** Beginner Level
- **Project Management Tools (JIRA):** Intermediate Level
- **Web Development** (*HTML, CSS, Java Script*): Beginner Level

## Functional Skill/ Business Process Understanding

- **Enterprise Business Intelligence & Analytics Leadership:** Owning end-to-end BI solutions by translating complex business requirements into scalable dashboards, KPIs, and executive-level insights
- Focus on **problem solving**, building **work efficiency** & strengthening **leadership** via effective communication within and outside the team

## Personal Information

- DOB: 13 June, 2002
- Languages known: English, Hindi
- Inclination towards learning new technologies and creative pursuits such as painting.
